What You See Is What You Sign

**Transaction signing
(capturing transaction data through QR code)**

16 buttons key pad with PIN protection

Replaceable 3 AAA batteries

Easy to deploy

FEITIAN
WE BUILD SECURITY

OTP c602 token is an easy-to-use visual transaction signing solution for protecting online banking services.

With its embedded camera it can provide the unique What-You-See-Is-What-You-Sign feature: no need to type in the long transaction data manually, instead all the data can be captured through encrypted QR code. In the meanwhile, OTP c602 also support normal TOTP for user login and the token is with PIN protection.

With all the useful features (PIN, TOTP, challenge/response and virtual transaction signing), OTP c602 can also provide multiple customization options and still be cost effective.

What-You-See-Is-What-You-Sign

Visual transaction signing can capture the critical transaction information automatically and present them securely on OTP c602's display, which can ensure that no one can tamper with the confidential transaction data.

Excellent User Experience

FEITIAN OTP c602's curve modeling is more suitable to hold, its camera module is having a 15° dip angle, with which a user can have a much better viewing angle.

Specifications

Casing Material	ABS + PMMA + Silicone		Working Temperature	–10°C ~ 50°C (14°F ~ 122°C)
Dimension	100 × 55 × 20.5 mm		Storage Temperature	–20°C ~ 70°C (–4°F ~ 158°C)
Weight	93.50g (incl. batteries)		Humidity	5 ~ 95% without condensation
Display	128 × 64 pixel LCD			
Camera	300K pixels		Time Interval	30 seconds, customizable
Keypad	16 buttons			
Battery	3 replaceable AAA-batteries and button cell (5 years)
